Seating Series

Superior craftsmanship, comfort, and sophistication meet in our Seating Series.

Commercial quality materials, construction, and finishes provide strength, durability, and a long-lasting, rich appearance. Our Signature Seating Series chairs and stools are created with 16-gauge, 1.25" steel tubing with solid MIG welded joints. Powder coated and triple chrome plated finishes resist rust, chips, and abrasions for enduring function and beauty.

Constructed in Holland, MI, the seats are high-density, US-made foam and commercial quality, marine grade vinyl. Dacron provides sustainable comfort and support, and a softer, rounder aesthetic. Custom artwork is digitally printed in-house using UV cured ink for a rich, long-lasting finish. Independently tested, our digitally printed vinyl seats showed no deterioration after rigorous, double-rub assessments.

Swivel stools feature our encased 52 stainless steel ball bearing S-360 swivels. Swivels are powder coated to resist rust and ensure a smooth rotation for a quality seating experience.

Available seat heights are 25" and 30" (L004-18 = 18"). 36" and custom seat heights may also be available. Contact us for more details or visit us at hollandbarstool.com for a complete list of options.

II: Measuring Seating, Tables, and Space

It's important to measure your seating and tables to ensure comfort. We recommend 12" between your seat height and the top of your table, counter, or bar. Standard seat heights and terminology are:

- 18" = Chair
- 25" = Counter stool
- 30" = Bar stool

To assist with proper measurements for your seating, please refer to the diagram and information to the right.

In addition, the below diagram illustrates the recommended seat height for common table, counter, and bar heights. If your table, counter, or bar is between the heights shown below, please contact us. We offer custom heights for many seating styles.

Measuring your space is also important. To calculate how many stools you will need for your space, measure your counter (in feet). Next, divide by two. This will give you the approximate number of stools to best fit your space. Two feet of counter space per stool is a comfortable arrangement for most Holland Bar Stool seating.
