# 304 Stainless Steel Seating with Breeze Vinyl

Superior craftsmanship, comfort, and sophistication meet in our 304 Stainless Steel Seating Series featuring outdoor-rated cushions with Breeze vinyl.

Commercial quality materials, construction, and finishes provide strength, durability, and a long-lasting, rich appearance. Our 304 Stainless Steel chairs and stools are created with 16-gauge, 1.25" steel with solid MIG welded joints. All hardware is stainless steel - from the seat staples, to the nuts, bolts, and screws needed for assembly. The durable finish resists rust, chips, and abrasions to withstand all-weather elements for enduring function and beauty.

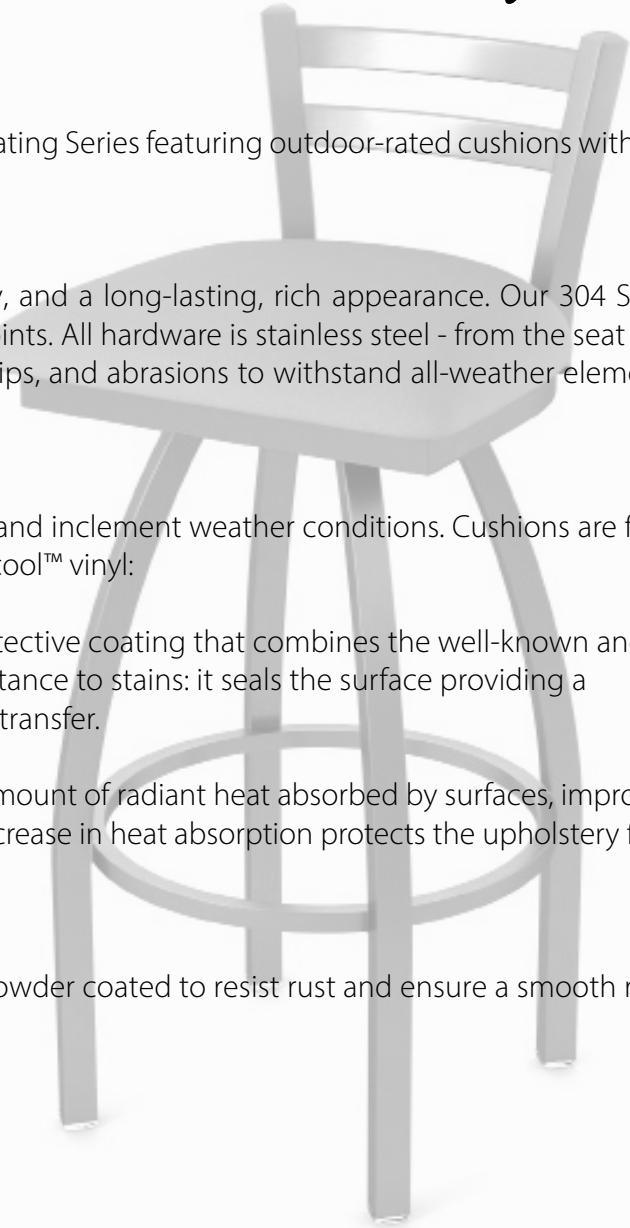

The seat cushions are constructed of a moisture-proof polycarbonate blank to withstand inclement weather conditions. Cushions are finished using your selected color of outdoor-rated Breeze with Permablok® Plus+ and Permacool™ vinyl:

Breeze vinyl with Permablok® Plus+ from Spradling® is a newly developed protective coating that combines the well-known and proven Permablok® formula (anti-stain and anti-abrasion) with enhanced resistance to stains: it seals the surface providing a shield against stains, makes cleaning easier, and improves the removal of dye-transfer.

Permacool™ is highly advanced reflective protection designed to reduce the amount of radiant heat absorbed by surfaces, improving the thermal sensation of upholstery during hot sunny days. In addition, the decrease in heat absorption protects the upholstery from added stress for superior longevity of your creations.

Swivel stools feature our encased 52 stainless steel ball bearing swivels. Swivels are powder coated to resist rust and ensure a smooth rotation for a quality seating experience.

# Permacool™ Testing Results

Temperature measurements as stipulated by ASTM D4803\*\*

Tests conducted under controlled scientific conditions in a laboratory, following the ASTM D -4803-10 standard (prediction of the heat build-up in rigid and flexible PVC building products above ambient air temperature, relative to black, which occurs due to absorption of the sun's energy). Temperature readings were taken every 30 seconds during the 20 minute test period with a plain black coated fabric as the test specimen (incorporating PERMACOOL technology) that is heated under an infrared reflective heat lamp to determine the temperature increase above ambient (laboratory) temperature, relative to a black control sample.

# Measuring Seating, Tables, and Space

It's important to measure your seating and tables to ensure comfort. We recommend 12" between your seat height and the top of your table, counter, or bar. Standard seat heights and terminology are:

- 18" = Chair
- 25" = Counter stool
- 30" = Bar stool

Please note seat heights for cushioned options measure slightly higher to account for compression while seated.

To assist with proper measurements for your seating, please refer to the diagram and information to the right.

In addition, the below diagram illustrates the recommended seat height for common table, counter, and bar heights. If your table, counter, or bar is between the heights shown below, please contact us. We offer custom heights for many seating styles.

Measuring your space is also important. To calculate how many stools you will need for your space, measure your counter (in feet). Next, divide by two. This will give you the approximate number of stools to best fit your space. Two feet of counter space per stool is a comfortable arrangement for most Holland Bar Stool seating.

Holland Bar Stool is no ordinary bar stool company. For over 30 years, we've built our reputation on exceptional quality, craftsmanship, and service—delivering furniture that combines durability, comfort, and style.

What began as a small line of wooden stools has grown into a complete offering of seating, tables, décor, recreation, and game room products. From our facility in Holland, Michigan, each piece is thoughtfully designed and built to enhance indoor and outdoor living spaces alike.

We stand behind every product with uncompromising quality and attention to detail. Independently tested to meet or exceed ANSI/BIFMA standards, our furniture is built for long-term performance. Our experienced team is dedicated to delivering value at every step—from design to delivery.

With a one-piece minimum, standard 7–10 business day lead times, and drop-ship capabilities, our on-demand model helps reduce inventory needs while keeping ordering simple and efficient.

Let us be part of your next project—and help you create spaces designed to be enjoyed for years to come.
